

K. SIVACHIDAMBARAM

Flutter Application Developer

Chennai, Tamil Nadu | +91 9092742287 | sivachidambaramcse@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Flutter Application Developer with 2 year of hands-on production experience building and shipping cross-platform mobile applications for Android and iOS. Delivered 2 Flutter apps currently live on the Google Play Store. Proficient in Flutter, Dart, Riverpod state management, Clean Architecture (MVVM), REST API integration, Firebase FCM push notifications, and Razorpay payment gateway integration. Experienced in end-to-end mobile app development lifecycle — from Figma design handoff through Play Store deployment and iOS TestFlight submission. Skilled in performance optimisation, OTP authentication, and scalable, testable codebases.

TECHNICAL SKILLS

Mobile Development	Flutter, Dart, Android, iOS (Cross-Platform)
State Management	Riverpod, Provider
Architecture	Clean Architecture, MVVM, Data/Domain/Presentation Layers
Backend & APIs	REST API Integration, JSON Parsing, Node.js (Consumption), Firebase FCM, Push Notifications
Authentication	OTP Authentication, Firebase Auth, JWT Token Refresh
Payments	Razorpay Payment Gateway Integration
Database / Storage	Hive (Local Caching), SQL
Programming Languages	Dart, Java, SQL
Tools & IDEs	Android Studio, Git, GitHub, VS Code
Maps & Location	Google Maps API, Real-Time Location Tracking
Build & Deployment	Google Play Store Deployment, Apple TestFlight (iOS), CI/CD
Design Tools	Figma (Design Handoff)
Soft Skills	Leadership, Communication, Adaptability, Problem Solving

WORK EXPERIENCE

Flutter Application Developer

Klix Tech | Anna Nagar, Chennai, TN | June 2024 – Present

- Independently developed and shipped 2 production Flutter applications for Android and iOS platforms, both currently live on Google Play Store with active users.
- Architected complete feature modules using Riverpod state management following Clean Architecture (data / domain / presentation layers), ensuring scalable, maintainable, and testable codebases.
- Optimised app startup time by approximately 35% through lazy-loading non-critical widgets and implementing Hive local storage for API response caching.
- Implemented OTP-based authentication using Firebase Auth and JWT token refresh logic, reducing session timeout errors by over 90%.
- Integrated Razorpay payment gateway for in-app booking payments with real-time order status callbacks and error handling.
- Configured Firebase FCM push notifications for real-time updates, enabling instant delivery of booking status and alerts to users.
- Led end-to-end mobile app delivery: Figma design handoff → REST API integration → QA testing → Google Play Store deployment → iOS TestFlight submission.
- Integrated Google Maps API for real-time pickup and delivery location display in driver-facing Flutter application.

- Collaborated with Node.js backend team to define and consume REST APIs for booking management, user profiles, and service request handling.

PROJECTS

Kancaroo Car Carriers – Customer App (Flutter | Android & iOS) | [Play Store: Live](#) | [iOS: TestFlight](#)

- Built customer-facing Flutter application for car carrier booking, implementing Clean Architecture with Riverpod state management.
- Integrated Razorpay payment gateway for seamless in-app booking payments with order confirmation and status callbacks.
- Implemented Firebase FCM push notifications for real-time booking status updates to customers.
- Developed OTP login, dynamic multi-step booking forms, and a live booking status tracking dashboard.
- Consumed Node.js REST APIs for booking management, user profiles, and service request workflows.
- Deployed Android app to Google Play Store; iOS version submitted to TestFlight for beta testing.

Kancaroo Car Carriers – Driver App (Flutter | Android & iOS) | [Play Store: Live](#) | [iOS: TestFlight](#)

- Built driver-side Flutter app for managing car pickup and delivery operations using Riverpod state management.
- Integrated Google Maps API to display real-time customer pickup and delivery locations with live tracking.
- Consumed REST APIs for booking updates, delivery tracking, driver status management, and route optimisation.
- Published on Google Play Store; iOS version available on TestFlight for testing.

Hotel Tips Management Application (Flutter)

- Developed a mobile app to manage and track hotel staff tips with role-based login and data access controls.
- Built interactive data visualisation dashboards with monthly and yearly graphs for tips reporting using Flutter charts.
- Implemented dynamic date-range filters and REST API integration for real-time tips data management.
- Configured Firebase FCM push notifications for instant tip alerts to staff members.

EDUCATION

Bachelor of Engineering – Computer Science Engineering (CSE)

Mepco Schlenk Engineering College, Sivakasi, TN | CGPA: 6.56 / 10 | 2021 – 2024

Diploma – Computer Engineering (CE)

MSPVL Polytechnic College, Tenkasi, TN | 87% | 2018 – 2021

CERTIFICATIONS

- Udemy – The Complete Flutter Development Bootcamp with Dart (Dr. Angela Yu) — Completed July 2024
- NPTEL – Certificate in Operating Systems
- Google – Fundamentals of Digital Marketing
